Projects

Life Cycle Sustainability Tool for Metallurgy and Mining — Oct 2025 - Dec 2025

- Designed and developed a full-stack MERN-based Life Cycle Assessment (LCA) platform to evaluate environmental impact in the mining and metallurgy sector, using a modular, data-driven architecture.
- Built and optimized scalable RESTful APIs using Node.js and Express.js for dataset ingestion, process modeling, emissions calculation, and lifecycle impact reporting — reducing record load time by ~40%.
- Implemented a responsive ReactJS frontend with Tailwind CSS and MongoDB integration, improving user experience and enabling reliable data-driven decision-support workflows for 500+ lifecycle records.

Counterfeit Product Verification System — Feb 2025 - May 2025

- Developed a full-stack counterfeit product verification system supporting QR code-based authentication, enabling users to verify product authenticity with unique hash-based IDs.
- Implemented secure CRUD operations, real-time status tracking, admin dashboards, and server-side validation to prevent duplication — handling a product database of 1,000+ entries.
- Engineered hash-based identity generation and SQL-backed storage with server-side validation, reducing counterfeit entry attempts by enforcing strict uniqueness constraints.

Training

Basics of DSA – LPU | Link — Jun 2025 - Jul 2025

- Developed a parking slot allocation system using core Data Structures and Algorithms in C++, focusing on efficient space management and optimized slot assignment.
- Applied Object-Oriented Programming (OOP) principles and performed time complexity analysis to improve system performance and reliability.
- Completed rigorous problem-solving exercises covering arrays, linked lists, trees, graphs, and dynamic programming, strengthening algorithmic thinking and code optimization skills.

Certificates

Java Programming — **May 2025**
LPU — Certificate Link

Cloud Computing — **Apr 2025**
NPTEL, IIT Kharagpur — Certificate Link

Python for Data Science — **Feb 2024**
Board Infinity — Certificate Link

Technical Skills

Languages: C, C++, Java, Python, JavaScript

Technologies/Frameworks: React.js, Node.js, HTML, CSS, Tailwind CSS, Bootstrap, Git, GitHub

Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design

Education

Lovely Professional University — **Jalandhar, Punjab**
Computer Science and Engineering — CGPA: 7.03 — **Aug 2023 – May 2027**

New Bright Moon Sr. Sec. School — **Jaipur, Rajasthan**
12th with Science — Percentage: 94.60 — **Jun 2020 – Mar 2021**

New Bright Moon Sr. Sec. School — **Jaipur, Rajasthan**
10th — Percentage: 87.00 — **Jun 2018 – Mar 2019**
